

1st Feb 2021

Dear Valued Business Partners,

Starting from April 2020 and continue to the present, the cost of copper and other raw materials has increased significantly.

As such Commscope is announcing a price increase of 10% for copper cables effective from 4th March 2021.

We will implement this price increase on orders shipped on or after 4th March 2021. For orders placed prior to 4th March current pricing will be maintained provided delivery is taken immediately and that order is consistent with normal ordering pattern. We will review orders prior to 4th March 2021 and honor the pricing if shipments are delayed due to Commscope lead time issue.

The decision to implement this price increase was made after careful consideration of market conditions and raw material prices projections. We continue to monitor our costs closely and will make adjustments as and when necessary.

Thank you for your continued support in bringing Commscope solutions to the marketplace. Please contact the local Commscope sales representatives if you have any questions.

Sincerely,

Jimmy Ng
