Legrand Australia Price Adjustment 1st November 2021

Dear Valued Customer,

Legrand Australia continues to focus on supplying the electrical and building industry new innovative products to support and grow opportunities for our valued partners.

Over the past 18 months our local and global R&D and Manufacturing teams have continued to bring numerous new products to market across our Connected Devices, Emergency Lighting, Data, Power Solutions and Wiring Device ranges to name a few.

Throughout this period our industry has experienced major cost impacts, to date we have absorbed these to minimise the impact for you. Unfortunately, as the complexity of this situation evolves we can no longer absorb all associated costs and now need to pass on a portion of these across parts of our portfolio.

Effective 1st November 2021 Legrand Australia will be implementing an average weighted price adjustment of 6.3%, the price adjustments vary by range and product.

With these adjustments we have ensured many of our more recently released new products will not be affected including our Connected Wiring Devices, Economy Emergency Lighting range and many other new releases from this year.

We appreciate your ongoing support and look forward to continuing to bring new opportunities for our partners and customers today and in the future.

Yours Sincerely,

Tosh Bourke
