

22<sup>nd</sup> December 2021

Dear Valued Customer,

Thank you for your continued support of Clevertronics throughout 2021.

It has been many years since Clevertronics has passed on a price increase, we have endeavoured through our continuous focus on R&D and innovation in each generation of our systems and products, that the best possible value proposition is delivered to both the customer and the end users.

The unprecedented global dynamics in supply chain, cost of materials and componentry is very challenging leading to significant increases across the board.

Whilst every effort has been made to mitigate these pressures, we would like to advise you of an average price increase of 3.9%, whilst the price increase may differ between specific products, categories and ranges.

The price increase will be effective as of 1<sup>st</sup> March 2022, our sales team will be in touch in January to discuss and work through the associated price files.

Regards,

Tony Todaro

**Managing Director  
Clevertronics Pty Ltd**
