Price Adjustment Notification Effective 1st July 2022

Dear Valued Customer,

Eaton is committed to providing innovative, high quality and cost-effective power management solutions to industry in a responsible and sustainable manner.

Our commitment to 'doing business right' underpins our value proposition to market and by association the value proposition of our channel partners as well.

To ensure that we continue to deliver on this commitment we are announcing a price increase as of the 1st July 2022. This will generally equate to a 3.8% increase across the vast majority of circuit protection and controls products. There will be some outlying products that are subject to either larger increases or no increase at all.

This price increase has been driven by an increase primarily in costs across our supply chain and production including increases in the cost of raw materials.

We thank you for your business and urge you to contact your local Eaton representative with any questions you may have in relation to this announcement.

Sincerely,

Eaton Electrical Australia Team
